LIST OF PAPERS IN ALPHABETIC ORDER

3D geomechanical modeling of cavity growth in loosely consolidated sandstone
M. Nassir & D. A. Walters

A calcarenite exposed to true fire conditions: a methodological proposal
V. Brotóns, R. Tomás & S. Ivorra

A comparative study on the heat loss of rock cavern type and above-ground type thermal energy storage systems

A coupled XFEM-HM method for fracture dynamics and groundwater flow in geological porous media
M. Faivre, R. Giot, F. Golfier & P. Massin

A detailed look at pre-peak dilatancy in a granite – determining “plastic” strains from laboratory test data
G. Walton, M. S. Diederichs & J. Arzúa

A lab-testing based geomechanical characterization of metamorphic rocks focusing on post-failure behaviour
I. Pérez-Rey, J. Arzúa, J. Barbiero, L. R. Alejano & G. Walton

A new approach for evaluation of in-situ inclinometer measurements based on two cases in Turkey
M. Mesutoğlu & I. Özkan

A new approach for modeling heat transfer between a freeze pipe and the surrounding ground
M. Vitel, A. Rouabhi, M. Tijani & F. Guérin

A new approach of limit equilibrium models for rock joints
M. J. A. Leal Gomes & C. A. J. V. Dinis Da Gama

A new rheological hardening model for prediction of creep deformation of rock samples
M. Karami, A. Fahimifar & E. Pakniat

A preliminary evaluation of an enhanced FDEM code as a tool to simulate hydraulic fracturing in jointed rock masses
A. Lisjak, O. K. Mahabadi, P. Kaifosh, T. Vietor, G. Grasselli
A review of ground support systems performance subjected to dynamic loading
L. Li, P. Hagan & S. Saydam

A review on the impacts and causes of landslides associated with recent earthquakes in Iran
K. Amini Hosseini, F.L. Pellet & M. Keshavarz Bakhshayesh

A Rock mass elastic modulus estimation using Mae Moh Mine's Large scale experiment data
N. Mavong, A. Chaiwan & C. Leelasukseree

A semi-analytical procedure for circular opening in strain-softening rock masses
L. Cui, J. Zheng & R. Zhang

A strain-dependent strength and dilation model of rock to study pre-peak behaviour in confined tests
J. González-Cao

A study of a joint model incorporating excavation-induced opening effect
Y. Li, J. Oh, R. Mitra & B. Hebblewhite

A tool for semi-automatic geostructural survey based on DTM – a case study from NW Italy
S. Bonetto, A. Facello & G. Umili

A two-dimensional vibration model for mountain tunnel lining built with poling-board method
Y. Gao, Y. Jiang & B. Li

A unified thermo-plastic/viscoplastic constitutive model for geomaterials
S. Raude, F. Laigle, R. Fernandes & R. Giot

Abacus for the analysis of technical and economical consequences of over-excavation in tunnels
C. Iglesias, M. Veiga & H. Larrocha

Abrasivity measures on geotechnical materials of the Barcelona area
C. González, M. Arroyo & A. Gens

Abu Hamour, TBM Launch Shaft – a rock mass classification attempt for a deep shaft in Doha, Qatar
J. B. Stypulkowski, A. K. Pathak & F. G. Bernardeau
Advanced 3D geotechnical modeling of Las Cruces Open pit
S. Cooper, M.d. Rodríguez, V. Pozo & J. M. Galera

Advances, current limitations and future requirements for a numerical shear box for rock joints using PFC2D
E. Lassari, F. Johansson, D. Mas Ivars & A. Sánchez Juncal

Ageing of chalk rocks in underground quarries
N. Lafrance, M. Souley, C. Auvray, O. Favreau & V. Labiouse

An application of epoxy and polyurethane on various marbles to enhance cuttability
M. Başyiğit, O. Bayram & H. Tunçdemir

An approximation to the prediction of the extent of the area crushed around a blasting drill
F. Bastante, E. Alonso & M. A. González

An investigation of different drill bits and drilling angles in blast hole drilling
D. Akbay & R. Altındağ

Analysis of a complex slope failure in a quartzite slope
C. León Buendía, J. Santamaría, L. R. Alejano & R. Giráldez

Analysis of a deep-seated slope movement in a marly-arenaceous formation
E. Celluzzi, A. Graziani & A. Lembo-Fazio

Analysis of potential rockfalls and protection measures for the Mardin Castle, Turkey
N. Dadashzadeh, C. Aras, N. Yesiloglu-gultekin, A. Bilgin & H.S.B. Duzgun

Analysis of the conditions of stability and stabilization of two slopes, in AP-68 with K.P. 59+743 to 60+038 and in AP-7 with K.P. 581+250 to 581+315, and incorporating the terrestrial photo restitution
S. Rodón, F. J. Castanedo & M. Sopena

Analysis of the geotechnical data monitored during Saint- Martin-la-Porte access gallery excavation
H. Tran Manh, J. Sulem & D. Subrin
Analysis of the performance of an evolutionary computation algorithm in the identification of geomechanical parameters in underground works
T. Miranda, A. Gomes, J. Sena-Cruz, L. Costa & D. Dias

Analysis on the pre-injection grout consumption at Strindheim Road Tunnel Project, Trondheim, Norway
K. K. Panthi

Analytic stress solutions for a circular pressure tunnel at great depth including support delay and pure slip boundary condition

Anisotropic mechanical properties of shales and the influences on hydraulic fractures
G. Q. Zhang, T. Fan & Y. Lou

Applicability of acoustic emission technique for vertical stress determination in mine pillars
G. Panéro & C. Dinis Da Gama

Application of a novel constitutive shotcrete model to tunneling
B. Schaedlich, H. F. Schweiger, T. Marcher & E. Saurer

Application of the electrical tomography technique in the design of a soil-nailing reinforcement for a slope in karstic limestone and sandy colluvial
I. Pérez-Santisteban, J. Dorronsoro & F. Puell

Application of the Hoek & Brown (1980) failure criterion to the definition of the foundation of an arch dam
C. M. Baena, C. Granell & C. Olalla

Application of the Observational Method in the Áspö Expansion Project
R. Christiansson, I. Olofsson, D. Martin, M. Holmberg, & Anders Carlsson

Application of transient methods to the assessment of permeability of well cements
I. Falcon-suarez, B. Rodríguez-Cedrun, J. Delgado-Martín & J. Canal-Vila
Artificial Neural Network (ANN) based model for predicting of overall strength of Volcanic Bimrock
H. Sonmez, A. Coskun, M. Ercanoglu, D. Turer, K. E. Kasapoglu & C. Tunusluoglu

Assessing the permeability anisotropy of claystone by pulse test methods
R. Giot, C. Auvray & A. Giraud

Assessment of characteristic failure envelopes for intact rock using results from triaxial tests
J. Muralha & L. Lamas

Back analysis and radar interferometry monitoring in a large open pit slope

Back Analysis of a general rock failure in a marble quarry
M. Martínez-Segura, E. Trigueros & J. Mulas

Behavior of a fractured reservoir over time based on geomechanical modeling
H. W. Stockhausen, M. R. Lakshmikantha, V. Sifontes & M. E. Barboza

Biot’s effective stress coefficient of rocks for peak and residual strengths by modified failure envelope method
B. N. Dassanayake & Y. Fujii

Cements of improved sealing capacity in CO2 geological storage
E. Estévez, L. Valle, D. del Barrio, G. Blázquez, T. Kovács & V. Blázquez

CFD-DEM simulations for injection of cement-based grout - the effect of rock fracture roughness-
S. Sakakibara, H. Shimizu & T. Koyama

Characteristic strength of anisotropic rock
N. Bozorgzadeh & J. P. Harrison

Characterization of the rock joints by fractal analysis
R. Galindo, A. Serrano & C. Olalla
Characterizing the influence of micro-heterogeneity on the strength and fracture of rock using an FDEM-μDFN approach
P. Hamdi, D. Stead & D. Elmo

Comparison between continuous and discontinuous approaches to tunnel models: FLAC vs. UDEC
M. Veiga, J. Barbiero, S. Alonso, L. R. Alejano & A. M. Ferrero

Comparison of change of creep properties of chromite ore under varying stress and time factor to find their interdependence
S. Kabra

Comparison of disc cutter consumptions in two tunnelling machines due to wearing in two tunnels partially built in ortogneis
P. R. Oyanguren, C. Laín, R. Laín & C. González

Comparison of predicted and actual conditions of the rock mass in the Tunnel Stražina
K. Ravnjak, G. Grget & M. S. Kovačević

Considerations on the laboratory estimate of the basic friction angle of rock joints
J. González, N. González-Pastoriza, U. Castro, L. R. Alejano & J. Muralha

Constraining the magnitudes of maximum and minimum horizontal stresses from borehole breakouts – A comparison between different rock failure criteria
W. Lin

Continuum and discontinuum modelling of gravity dams on jointed rock foundations
Y. M. Alshkane, A. M. Marshall & L. R. Stace

Co-relation between physico-mechanical and chemical properties of cement & resin capsules used in underground mines
A.K. Rana, K. Das & G. S. Kumar

Correlation of direct and indirect tensile tests for use in the Hoek-Brown constant m
S. A. L. Read & L. R. Richards
Correlations between static and dynamic elastic modulus of a calcarenite heated at different temperatures
V. Brotóns, S. Ivorra & R. Tomás

Coupled hydro-mechanical simulations demonstrate system integrity at the Ketzin pilot site for CO2 storage, Germany
T. Kempka, S. Klapperer & B. Norden

Coupling photogrammetric data with a discrete element model for rock slope stability assessment
V. Bonilla-Sierra, F. V. Donzé, L. Scholtès & M. Elmouttie

Critical review of EC7 concerning prescriptive measures of rock mechanics designing
R. Olsson & A. Palmstrøm

Critical review of Eurocode-7 regarding monitoring rock masses by field instrumentation: devices and data analysis
M. R. Migliazza, A. M. Ferrero, A. Segalini & G. Urmili

Critical review of Eurocode-7 regarding rock mass characterization
L. R. Alejano, A. M. Ferrero & A. Sofianos

D&B versus TBM: Review of the parameters for a right choice of the excavation method
F. J. Macías & A. Bruland

Damage detection of rocks under conventional triaxial compression

Deepening of Juankoski Canal - strengthening of rock and blasting under bridge
Avellan K. C. & Nuutinen, T. K.

Deformation behavior and shear wave velocity under confined triaxial extension stress
M. Takahashi, H. Park, Y. Fujii & M. Sato

Dependency of deformability, strength and failure characteristics of clay shales on capillary suction
F. Amann, K. Wild & L. Wymann
Design and control of the EDZ for a deep repository in crystalline rock
H. Ittner, T. Lehtimäki, R. Christiansson

Design of rock dowels using numerical analysis and Eurocode 7
A. Koe & B. Ogunmakin

Detection of faults and hidden granites in metallic mine using ground penetrating radar tomography
F. Yang, C. Du, X. Xu, Y. Liang & X. Xu

Detection of underground instabilities in an old limestone quarry through acoustic monitoring

Determination material properties on Bedding Contact for slope stabilization at the low-wall part of coal mine
Supandi ST. MT

Determination of an “empirical” ground reaction curve useful for designing coal mine roadways support
R. Rodríguez & M.B. Díaz-Aguado

Determination of states of stress in hard rocks: Results of laboratory conducted finite deformation analysis
A. Förster & Ch. Lempp

I. Contreras, E. Fernández & N. Belandria

Deterministic In-situ block size estimation using 3D terrestrial laser data
H. Vanhaekendover, R. Lindenbergh, D. Ngan-Tillard, S. Slob & U. Wezenberg

Developing early age strength in Fibre Reinforced Shotcrete (FRS): effects of accelerator type and rate of dosage

Development of gas-tightness evaluation system for KURASHIKI national LPG stockpiling base
Y. Okazaki, T. Maejima, S. Okubo, H. Kurose & C. S. Chang
Development of testing methods of Thin Spray-on Liner shear-bond strength

Different FEM Models for simulation of the Osterberg Load Test in rock shafts
S. Melentijevic & C. Olalla

Dimensioning of a flexible system for the stabilization of a landslide on the access road to Cotobello (Aller, Asturias)
J. Prieto, R. Luiz, R. Fernández & M. Fernández

Distinct element method simulation of stress fracturing around an underground opening
N. Bahrani, B. Valley & P. K. Kaiser

Drilling optimization based on a geomechanical analysis using probabilistic risk assessment, a case study from Offshore Iran
S. Rafieepour & H. Jalalifar

Dynamic fracture behavior of cubic and core specimens under impact load
G.H. Khandouzi, A. Mirmohamadlou & H. Memarian

Dynamic strain wave analyses of parallel cut blasting model test for vertical shaft
Q. Y. Ma, P. Yuan, B. Han, J. S. Zhang & H. X. Liu

EC7 and the application of analytical and empirical models to rock engineering
J. P. Harrison, H. Stille & R. Olsson

Effect of infill thickness on shear behaviour of jointed rock under CNS condition
A. K. Shrivastava & K. S. Rao

Effect of loading rate on fracture behaviour of rock materials
Q. B. Zhang & Y. Zou

Effect of supercritical CO2 on the Corvio Sandstone in a flow-thru triaxial experiment
J. Canal, J. Delgado, I. Falcón, V. Barrientos, R. Juncosa & B. Rodríguez- Cedrún
Effectiveness of applied support in tunnels in plastically deformed rockmass - an analysis based on tunnelling projects from Nepal Himalaya
P. K. Shrestha & K. K. Panthi

Effects of loading conditions on strength and deformability of fractured rocks - a numerical study
M. Noorian Bidgoli & L. Jing

Effects of reservoir development on the well casing behavior

Efficient numerical integration of Perzyna Viscoplasticity, with application to rock slope stability using Zero-Thickness interface elements
I. Aliguer & I. Carol

Energy analyses of uniaxial impact compressive tests for coalmine sandstone after cyclic wetting and drying
P. Yuan & Q. Y. Ma

Estimation of crack tensor components for the different distributions of crack orientation
F. Idziak

Estimation of rock mass deformation modulus using a Bayesian approach
X. D. Feng & R. Jimenez

Eurocode 7 and rock engineering: current problems and future opportunities
J. P. Harrison

Evaluation of pillar width on crush pillar behavior using a limit equilibrium solution
M. Du Plessis & D. F. Malan

Evaluation of the effectiveness of a new nanoconsol idant in granitic rocks
I. De Rosario, J. Feijoo, T. Rivas, M. J. Mosquera & F. Elhaddad

Evolution of damage on tensile fracturing of rock by means of elastic ultrasonic wave velocity
M. Ghamgosar, N. Erarslan & D. J. Williams
Experiences implementing high energy dynamic barriers as a tool for creating a shadow zone against rockfalls in linear infrastructures.
R. Luis, C. Raimat & A. Sanz

Experimental and numerical study of fracture aperture estimation and characteristics of non-linear fluid flow through artificial fracture intersections
R. Liu, Y. Jiang, B. Li, X. Wang & H. Huang

Experimental evaluation of the fracture toughness of a limestone
G. Suhett Helmer, J. Sulem J. Rohmer, S. Ghabezloo & Hild. F

Experimental relationships among strength parameters in monoaxial loading conditions determined for porous effusive rocks
T. Rotonda, L. Verrucci & P. Tommasi

Experimentally-based relation between dynamic and static elastic moduli of various sandstones and a quartzite
M. Alber

Extended rock mass characterisation from 3D images
A. Gaich, M. Pötsch & W. Schubert

Face stability in tunnels excavated by the drill and blast method
S. Senent & R. Jimenez

Failure behavior and acoustic emission pattern of slate and mica schist in uniaxial loading
N. Slatalla & M. Alber

Finite element simulation of crack initiation and propagation in rocks
G. Sivakumar & V. B. Maji

Foundation properties of variably weathered rock beneath a heavy mineral processing plant
D. C. Starr & E. T. Brown

Fracture mechanical evaluation of hydraulic fracturing laboratory experiments
F. Stoeckhert, S. Brenne, M. Molenda & M. Alber
Fracture properties after hydraulic stimulation in low-permeability sediments (GeneSys-project)
E. Pechan, T. Tischner & J. Renner

Fracturing and indirect tensile strength of brittle and ductile rocks
N. Erarslan & M. Ghamgosar

Geomechanical simulation of the injection of CO2 into saline aquifers with respect to risk assessment
M. Adams, M. Feinendegen, M. Ziegler & T. Kempka

Geomechanical study with outcrop samples to improve drilling performance for an exploration well in Northwest Africa

Geophysical characterization of an instable rock mass
C. Colombero & C. Corrina

Geotechnical Analyses of Mine Seismicity and control measures in the Western US Mines
H. Maleki

Geotechnical characterization and correlations obtained in a Flysch unit
Alkorta Lertxundi, R. Moreno Bernal, G. Martínez Ruiz & S. Sánchez Rodríguez

Geotechnical characterization of low strength anisotropic rocks in the Strait of Gibraltar area
A. Perucho, M. Muñiz & J. A. Díez

Geotechnical characterization of rocky materials from Arteara rock avalanche (Gran Canaria)
M. Santana, J. Estaire & J. Yepes

Geotechnical characterization of the site and stability of a tailing dam in Ecuador
M. R. Ponce-Zambrano, D. P. Gordón, L. R. Alejano & I. Pérez-rey

Geotechnical safety management for tunnels
W. Schubert & B. A. Moritz

Gravitational instability of a micaschist formation and its effects on road infrastructure
D. Simic & J. López
Hazard analysis for rock-fall onto touristic beaches from overhanging cliffs in ophiolitic rock-mass
M. Coli, I. Erbetta & E. Livi

Horizontal stresses at shallow depths in Seoul (Korea) gneissic region
E. S. Park, B. H. Choi, S H.. Bae & S. Jeon

How to refine the Observational Method as described in EC7 in applied rock mechanics
H. Stille & D. Virdy

Hydraulic fracture propagation under steady state fluid flow
A. Pouya, V.L. Nguyen & S. Ghabezloo

Hydraulic fracturing of a devonian slate under confining pressure - with emphasis on cleavage inclination
S. Brenne, M. Molenda, F. Stöckhert & M. Alber

Hydro-mechanical coupling in zero-thickness interface elements, formulation and applications in geomechanics

Identification of rheological behavior of salt rock at elevated temperature, case study: Gachsaran evaporative Formation, Iran
N. A. Ghavidel, A. Nazem, M. Heidarizadeh, M. Moosavi & H. Memarian

Identification of the dependency to water content of the mechanical properties of Channel tunnel chalk.
S. Maiolino

Impact of destress blasting on stress field development ahead of hardcoal longwall face
P. Konicek, J. Ptacek, L. Stas, R. Kukutsch, P. Wadawik & A. Mazaira

Improving teaching methods of rock mass classification parameters
P. T. Barbens, L. Uotinen, T. L. Toivanen & C. Edelbo

In situ stresses in rock masses: methodology for its study in tunnel projects in Spain
G. Madriolas & A. Perucho
Influence of groundwater and joints orientation in the Tunnel Prado support
D. Salorio, J. P. Villanueva, F. J. Castanedo, L. Jordá & C. Oteo

Influence of intermediate principal stress on correction formula of bearing capacity of rock foundation
Z. M. Zhang, W. D. Lei

Influence of model selection, constitutive behavior assignment and parametric sensitivity on tunnel, cavern and pillar EDZ assessment for a long-term deep geological repository.
M. S. Diederichs, T. Lam M. Jensen, M. Perras & B. Damjanac

In-situ stress amplification in tunnels from Spain, Iran and Chile estimated by TSI and SAF indices
L. González De Vallejo, T. Hijazo, J. M. Galera, Z. A. Entezari

Isolation roof caving control and monitoring technology of room and pillar method goafs
W. Li, B. Zhang & Z.W.Bi

Kinematic analysis of block rotations in a jointed rock mass
M. Pötsch & W. Schubert

Kinematic analysis of the western pitwall of the main pit in the Letseng Diamond Mine, Lesotho
M. N. Lephatsoe, E. D. C. Hingston, M. Ferentinou & N. Lefu

Laboratory analysis of thermal fatigue in limestone
M. Gasc-Barbier, G. Girma & V. Gendre

Laboratory simulation of CO2 injection in sandstones and sands for improved seismic monitoring of CO2 reservoirs.
J. Falcon-Suárez, L. North, A. Best, J. Sothcott, J. Canal-Villa & J. Delgado-Martín

Main difficulties and lessons learnt during the TBM excavation in shales in the North portal of Pajares tunnels
M. B. Díaz-Aguado, J. García De Muro & R. Rodríguez

Mathematical approach for the analysis of in-situ measurements in unstable slopes: A study based on the cases from coal mines in Turkey
I. Özkan
Mathematical development of stress-strain law for rock block contacts
R. Galindo, A. Serrano & C. Olalla

Measurement of the basic friction angle of rock by three different tilt test methods
J. Ruiz & C. Li

Mechanical characterization of the rocks involved in the Albuñuelas landslide (South Spain)

MGC–RocDesign|CALC : a geomechanical calculator tool for rock design

Mining induced static stress transfer and its relation to a high-precision located Mw = 1.9 seismic event in a South African gold mine
M. Ziegler, K. Reiter, O. Heidbach, A. Zang, G. Kwiatek, T. Dahm G. Dresen & G. Hofmann

Modelling and redesign of retaining system of a Deep excavation in marl formation using back analysis results
Y. Kazan

Modelling methodology: structural geology and rock mass behaviour at Kiirunavaara Mine
J. Vatcher, S. D. McKinnon, J. Sjöberg & C. Dahnér

Monitored and calculated deformational behaviour of a large cavern during excavation
M. Espada & L. Lamas

Monitoring of the geomechanical state of rock mass using complex of satellite geodesy
A.A. Panzhin & N.A. Panzhina

Monitoring of the landslide at Durres-Morine road
A.Kosho, A. Malaj, L. Harizaj & S. Lamçe

Numerical analysis and monitoring of the Matinkylä Metro Station, Espoo, Finland
J. Pöllä & I. Konstantas
Numerical modeling of composite bilaminate materials as an analog for strength variation in anisotropic shale formations
B. Crawford, N. DeDonntney & B. Alramahi

Numerical simulation of sliding and toppling of a block system
G. P. Giani, S. Orsatti & L. Alejano

On the applicability of the Eurocode7 partial factor method for rock mechanics
A. Bedi & T.L.L. Orr

On the interpretation of numerical results in the study of rapid landslide run-out phase
M. Pirulli, C. Scavia & M. Tarabra

On the use of the continuity factor for rock mass properties based on a review of the representative elementary volume
P. Zhou & F. Johansson

On using informational fields, structural fractals for simulating response of jointed rock to underground explosion
S. Gharehdash & M. Barzegar

Optimum extraction of pillars by FLAC-3D where surface features is the Major Constrain
K. Das & G. Shiva Kumar

Parameter characterisation for rock mass preconditioning using hydraulic fracturing
G. F.Gambino, J. P. Harrison & A. Bedi

Petrophysical interpretation of mechanical behaviour of ornamental stones from Galicia (Spain)
N. Sanchez, A. Rodriguez-Rey, L. Calleja, V. G. Ruiz de Argandoña & C. Carrino

Photographic documentation of the face of a TBM-driven tunnel
M. R. Henzinger & R. Galler

Pit excavation for underground construction in an urban area near an old tunnel
Z. Arbanas, M. Vivoda & P. Kursar
Possible mechanical behavior of Elmadag and Artova Formations during tunnel excavation  
Ş. Ö. Dinç & M. C. Tunusluoğlu

Prediction of deformation modes of rock slope due to excavation on plateau type mine  
Najib, D. Fukuda & J. Kodama

Prediction of rock strength with matrix acidizing stimulation and induced wormhole by computational simulation methods.  
N. Jahani, G. Berge & B. Haugen

Prediction of the mechanical compressive behavior of granite using intelligent tools  
F. F. Martins, T. Miranda & G. Vasconcelos

Preliminary assessment of the scaling relationships of in-situ stress orientation variations indicated by wellbore failure data  
B. Valley & K. F. Evans

Preliminary design of underground crushing chamber  
E. Trigueros, M. Martínez & I. Alhama

Principles and methodologies for the design of hydroelectric large underground caverns  
R. Plassart & F. Laigle

Probability evaluation of localized failure: deep excavation case study  
D. Lydzba, A. Rozanski & M. Sobótka

Procedure for obtaining and analyzing the diametric deformation of a tunnel by means of tape extensometer convergence measures  
A. Bernardo-Sanchez & M. Arlandi-Rodríguez

Proposal of a new rock creep model  
V. Brotóns, S. Ivorra, R. Tomás, J. Martínez-Martínez & D. Benavente

Protecting roofing slates against oxidation: Analysis of the chemical interaction between protective treatments and pyrite  
J. Iglesias, J. Féjoo, J. Taboada, T. Rivas & M. Modino
Protective actions against rockslides on roads of Serra de Tramuntana. The case of Blau Gorg detachment on 2008, December 31st.
R. Luis, C. Raïmat, J. Prieto, J. M. Rius & C. Massanet

Protective treatments against pyrite and pyrrhotite oxidation in roofing slates
J. Iglesias, J. Feijoo, I. Cañas, J. Taboada & T. Rivas

QA/QC on physical and mechanical rock properties relevant for geomechanical analysis
U. Prasad, J. A. Franquet & D. A. Curry

Quantifying the discrepancy in preloads estimated by acoustic emission and deformation rate analysis
M. Karakus

Quantitative assessment of an excavation damaged zone from variations in seismic velocity and fracture distribution around a gallery in the Horonobe Underground Research Laboratory
K. Aoyagi, K. Tsusaka, K. Kondo & D. Inagaki

Realtime displacement monitoring using GPS for assessing slope stability
N. Shimizu, S. Nakashima & Y. Furuyama

Relationship between RMRb and GSI based on in situ data
F. Ceballos, C. Olalla & R. Jiménez

Reliability against translational slip of rock slopes designed according to Eurocode 7
P. P. Nomikos & A. I. Sofianos

Research on the Pre-displacement of Surrounding Rock during Tunneling
W. Shi, L. Miao & B. Zang

Results of laboratory tests on artificial block in matrix rocks
T. Pilgerstorfer & W. Schubert

Reversible deformation phenomena of a high stressed rock samples
V. V. Makarov, L.S. Ksendzenko, A.M. Golosov & N. A. Opanasiuk

Revise of cavern’s axis in Azad pumped storage project
M. R. Shahverdiloo, M. Behnia, A. Anvari, M. A. Motlagh
Risk associated with swelling rocks in volcanic Formations in the design of hydro-tunnels
J.M. Galera, M. Paredes, C. Menchero & V. Pozo

Rock grouting and durability experiments of colloidal silica at Kurashiki underground LPG storage base

Rock mass variability and TBM prediction
F. J. Macias, P. D. Jakobsen & A. Bruland

Rock strength assessment and structural features analysis on rocky coasts
A. Pires, H. I. Charriné, A. Pérez-Alberti & F. Rocha

Rockfall monitoring system for improving road safety

Rockfall protection structures in the Tramuntana range of Mallorca (Spain)
J. M. Rius Gibert & R. Aguiló González

Safety and economic advantages for rock blasting in urban áreas
C. Dinis Da Gama

Shale geomechanics: optimal multi-stage hydraulic fracturing design for shale and tight reservoirs
J. Leem & J. Reyna

Shapes of failure in collapsible materials.
A. Serrano, M. Conde & A. Perucho

Simulating the effect of preconditioning in primary fragmentation
A. Sánchez Juncal, D. Mas Ivars, A. Brzovic & J. Vallejos

Sliding stability analysis of a gravity dam founded on a rock mass with an impersistent joint set
M. Cabrera, S. Senent, C. Olalla & R. Jiménez

Slit local stress relieving and its application to unloading zonation of rock excavation surface
W. Yang, Y. Jianmin, Z. Chunhua & A. Kai
Slope stability control of a coal mine during the filling of the artificial lake
J. I. Piñeiro, J. Taboada & J. Martínez Torres

Slope stabilization at km 25.5 El Cobre highway – CODELCO Chile, El Teniente mine division
V.H. Recabarren & F.J. Peña

Slope stabilization methods. Alternatives for the containment of land slopes.
N. Barral- Ramón, R. Pérez- Álvarez & R. Laín Huerta

Some key issues regarding application of Eurocode-7 to rock engineering design
L. Lamas, A. Perucho & L. Alejano

Spread foundations and slope stability calculations on rocks according to Eurocode EC-7
J. Estaire & G. Olivenza

Stability analysis of a room & pillar hematite mine and techniques to manage local instability problems
J. Arzúa, L. R. Alejano, I. Clérigo, B. Pons & F. Ménde F. Prada

Studies in fracture stimulation induced tectonics in rock require new test equipment
J.B. Surjaatmadja, D. Meadows, K. Coffman & D. Looper

Study on distribution law of surrounding rock pressure in unsymmetrical loading tunnel with coupling effect from topography and geology
Z. F. Wang, L. H. Xu, Y. Kang, X. C. Wang & X. P. Long

System Reliability Analysis of a Circular Rock Tunnel Using a First Order Approximation
P. Zeng & R. Jimenez

Temperature induced-changes on the mechanical properties of a calcarenite
V. Brotóns, R. Tomás & S. Ivorra

Temperature-confining pressure coupling effects on the permeability of three rock types under triaxial compression
A. K. M. B. Alam, M. Niioka, Y. Fujii & D. Fukuda
Test study on a new rock burst tendency index—yield degree and its influencing factors
B. H. Guo, Y. Chen & P.F. Gou

Textural anisotropies characterization of granitic rocks using P waves velocities
L. Calleja, A. Rodríguez-rey, V.G. Ruiz De Argandoña, N. Sánchez Delgado & C. Camino

The application of stress control technologies in design of multiple seam layouts at energy west mining Company
H. Maleki, K. Fleck, C. Semborski, J. Christensen & L. Tonc

The approach to rock engineering in Spanish normative documents
A. Perucho & J. Estaire

The comparison of compression and impression relaxation tests with different diameters of indenter in salt rock
F. Tavanaei, M. H. Mehranpour, M. Moosavi

The development of a distributed optical sensing technique to Monitor Forepole temporary support elements employed within an Umbrella Arch System
Vlachopoulos, N., Forbes, B., Oke, J. & Hyett, A.J.

The effect of cyclic loading amplitude and notch crack inclination angle on the fracture toughness Test on Brisbane Tuff-Multiple factorial analyses
M. Ghamgosar & N. Erarslan

The influence of microwave radiation on hard rocks as in microwave assisted rock breakage applications
P. Nekoovaght & F. Hassani

The interaction between the scale effect and the shape effect in the mine pillar design
A.L.M. Ayres Da Silva & L.A. Ayres Da Silva

The load transfer mechanics of fully grouted cable bolts: a theoretical analysis
J. Chen, S. Saydam & P. Hagan
The reduction of surface settlement by employing Umbrella Arch Systems for different excavation methods
J. Oke, N. Vlachopoulos & M. S. Diederichs

The static and dynamic elasticity parameters of laminated silty - clay shales at the simulated depth up to 4 km
A. Dziedzic & J. Pinińska

The toppling of large blocks on the northeast slope of the Meirama mine
C. M. Bassa, P. R. Oyanguren, R. G. Philippon, M. Fernández-Pello

The use of active seismic methods to study seismic waves anisotropy in Triassic dolomites.
I. Stan- Kłeczek & M. J. Mendecki

Towards an improved observational method
J. Spross, F. Johansson, H. Stille & S. Larsson

Towards rockfall prediction: linking pre-failure deformation with precursory rockfall events.
M. J. Royan, J. M. Vilaplana & A. Abellán

Ultimate and serviceability state design using the same partial safety factor of contact pressure for Strip Foundation Loaded by Column Loads
Avellan, KC

Underground Gas Storage in Portuguese Salt Caverns
P. Vidal & C. Dinis Da Gama

Understanding the boundary effects by means of numerical modelling when performing punching test on small samples
J. P. Tshibangu, F. Descamps & G. Di Paolo

Unstable rock masses in the highway Durres- Prishtina
L. Sharra, L. Bozo & S. Allkja

Update of 1989 Bieniawski’s RMR guidelines for tunnel excavation and support
M. Romana
Upscaling elastic moduli in Copenhagen Limestone
N. Katic & H. F. Christensen

Using the distribution curves to optimize the block exploitation in natural stone quarries
A. Turanboy & E. Ulker

Vibration propagation in discrete element particle models of rock
R. Resende, E. Fortunato, C. Andrade & T. Miranda

Wellbore stability prediction: An improved methodology for a limited set of data
A. Diaz & K. Williams

X-Ray fluorescence methods for the recognition of minerals and rocks. Application to granite.
N. Barral-Ramón, R. Pérez-Alvarez & R. Laín Huerta
